

Exam Guide: Navigating FortiManager 7.4 Functions

Are you preparing for an exam on **FortiManager 7.4**? You're in the right place! This guide will take you through essential features, configurations, best practices, and tutorials to help you manage FortiManager effectively.

Understanding FortiManager 7.4 Features

FortiManager 7.4 comes packed with various features designed to enhance network management. Here are some key highlights:

- **Centralized Management:** Simplifies administration across multiple FortiGate devices.
- **Device Configuration:** Streamlined UI for easy configuration of network devices.
- **Policy Management:** Helps in creating and modifying security policies efficiently.

Getting Started with FortiManager 7.4 Configuration

Configuration is crucial for optimal performance. Here's how to get started:

1. Log into the FortiManager interface.
2. Select the device you want to manage.
3. Access the configuration tab and begin setting preferences according to your needs.

Helpful FortiManager 7.4 Tutorial

If you're new to FortiManager, following a tutorial can provide valuable insights. A structured approach could look like this:

- Familiarize yourself with the *dashboard*.
- Explore *device management* tools.
- Practice configuring a *test device*.

Best Practices for Using FortiManager 7.4

To make the most out of FortiManager 7.4, consider these best practices:

- Regularly update your software to benefit from latest features.
- Backup configurations to avoid data loss.
- Implement **role-based access control** for enhanced security.

Staying Updated with FortiManager 7.4

Keeping your FortiManager up to date is vital. Updates may include:

- **New features** and improvements.
- Security patches that ensure reliability.
- Performance enhancements for better device management.

Accessing FortiManager 7.4 Documentation

Documentation is essential for detailed understanding. It usually covers:

- Installation steps and requirements.
- Troubleshooting common issues.
- Advanced configurations and customization options.

For further details, check [this resource](#).

Now that you have a comprehensive guide, you're ready to dive deep into the world of FortiManager 7.4. Prepare yourself well, and best of luck with your exam! If you need more practice, visit [this link](#) for additional materials.

Real Exam Questions 2025

Below given questions are for demo purposes only. **The full version** is up-to-date and contains actual questions and answers.

Why Choose CertKillers?

Actual Exam Questions: We provide real exam questions updated regularly.

Exam Dumps: Downloadable PDFs with comprehensive questions and answers.

Weekly Live updates: Study Material questions and answers – Live updates.

Practice Tests: Practice tests and VCE PDF to assess your readiness.

Multi-Lingual Support: Full Version products available for download in all popular languages.

Success Guarantee: Pass your exam on the first attempt or get a refund.

Up-To-Date Test Questions: Up-to-Date Test Prep Questions that cover 2025 syllabus.

Instant Download: Instant download after successful payment.

Version: 4.0

Question: 1

Exhibit.

Given the configuration shown in the exhibit, which two statements are true? (Choose two.)

- A. An administrator can also lock the Local-FortiGate_root policy package.
- B. FortiManager is in workflow mode.
- C. The FortiManager ADOM is locked by the administrator.
- D. The FortiManager ADOM workspace mode is set to Normal

Answer: A, B

Question: 2

An administrator enabled workspace mode and now wants to delete an address object that is currently referenced in a firewall policy. Which two results can the administrator expect? (Choose two.)

- A. FortiManager will temporarily change the status of the referenced firewall policy to disabled.
- B. FortiManager will disable the status of the address object until the changes are installed.
- C. FortiManager will not allow the administrator to delete a referenced address object until they lock the ADOM.
- D. FortiManager will replace the deleted address object with the none address object in the referenced firewall policy.

Answer: C, D

Question: 3

What is the purpose of ADOM revisions?

- A. To save the current state of the whole ADOM
- B. To save the current state of all policy packages and objects for an ADOM
- C. To revert individual policy packages and device-level settings for a managed FortiGate
- D. To save the FortiManager configuration in the System Checkpoints

Answer: B

Question: 4

Refer to the exhibit.

Edit Address

Category: Address

Name: LOCAL_SUBNET

Color: Change

Type: Subnet

IP/Netmask: 192.168.1.0/255.255.255.0 Resolve from name

Interface: any

Static Route Configuration: ☐

Comments:

Add To Groups:

Advanced Options >

Per-Device Mapping

<input type="checkbox"/>	Mapped Device	Details
<input type="checkbox"/>	Local-FortiGate [root]	IP/Netmask: 192.168.1.0,255.255.255.240

An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask is shown on FortiManager for this firewall address object for devices without a Per-Device Mapping set?

- A. FortiManager generates an error for each FortiGate without a per-device mapping defined for that object.
- B. 192.168.1.0/24
- C. 192.168.1.0/28
- D. FortiManager replaces the address object to none.

Answer: C

Question: 5

Exhibit.

```
FortiManager # diagnose dvm device list
--- There are currently 1 devices/vdoms managed ---
--- There are currently 1 devices/vdoms count for license ---

TYPE          OID    SN          HA    IP          NAME          ADOM    IPS          FIRMWARE
fmgfaz-managed 325    FGVH010000077646 -    10.0.1.200    ISFW          ADOM2    6.00741 (regular) 7.0 MR4 (2463)
|- STATUS: dev-db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up
|- vdom:[3]root flags:1 adom:ADOM2 pkg: [imported]ISFW
```

Which two statements about the output are true? (Choose two.)

- A. The latest revision history for the managed FortiGate does not match the device-level database.
- B. Configuration changes have been installed on FortiGate, which means the FortiGate configuration has been changed.
- C. Configuration changes directly made on FortiGate have been automatically updated to the device-level database.
- D. The latest revision history for the managed FortiGate does match the FortiGate running configuration.

Answer: A, D
